Dear Investor,

On behalf of the Board of Directors, I am pleased to present **Alhamra Smart Portfolio** accounts review for the nine months ended March 31, 2024.

Economy and Money Market Review

Macroeconomic indicators have been on an improving path since the start of the fiscal year. The government secured a much-needed Stand-by Arrangement (SBA) facility of USD 3 billion from the IMF in June 23, and managed to receive timely rollovers from friendly countries. It also showed unwavering commitment to remain compliant with the IMF targets and as a result government was able to successfully reach staff level agreement with IMF in the first and second reviews. After formation of new cabinet, the government has also publicly announced its intention to seek a new IMF program of at least USD 6.0 billion after the current program expires.

The caretaker government, after facing speculative pressure on currency, took decisive steps against smuggling of dollar and abuse of Afghan Transit in September 2023, which spurred a rapid recovery in the exchange rate. This led to the reduction of the difference between open market and interbank rates, which consequently improved remittances and export proceeds. The government has been running a subdued current account balance, which along with increased clarity on the external front has led the local currency to depict strength. The USD PKR close the period at 277.9 appreciating by 2.9% since the start of the year.

Country posted a current account deficit (CAD) of USD 1.0 billion in the first eight months of the fiscal year 2024 (8MFY24) declining by 74% YoY compared to a deficit of USD 3.8 billion in the corresponding period last year. Narrowing trade deficit was the major contributor towards improving CAD as 10.2% increase in exports coupled with an 8.8% drop in imports led to a 27.6% contraction in the trade deficit. The county's external position improved with SBP's foreign exchange reserves increasing to USD 8.0 billion as of March 2024 compared to USD 4.4 billion at the end of last fiscal year. This was on account of flows from the IMF, friendly countries and multilateral sources.

Headline inflation represented by CPI averaged 27.1% during first nine months of the fiscal year compared to 27.3% in the corresponding period last year. Inflation remained on the higher side as massive currency depreciation in the prior periods led to surge in food and energy prices. The government also hiked electricity base tariff and gas prices to comply with the IMF conditions, which led to further inflationary pressures. The SBP maintained status quo in the monetary policy held on March 18, 2024. The Committee assessed that the level of inflation remains high and its outlook is susceptible to risks amidst elevated inflation expectations which warranted a cautious approach in the near term.

The country's GDP grew by 1.0% in the second quarter of the financial year 2023-24 as compared to 2.2% in the same period last year. Agriculture grew by 5.0%, Services remained flattish at 0.01% while industrial sector witnessed a decline of -0.84%. Historic high interest rates coupled with political uncertainty were the major culprits behind the fall in industrial output. On the fiscal side, FBR tax collection increased by 30.1% in 9MFY24 to PKR 6,709 billion, outpacing the target by a modest PKR 1bn.

Equity Market Review

The stock market witnessed exuberance in the first nine months of fiscal year 2024, as the benchmark KSE-100 increased by 61.6%, or 25,552 points, to close at all time high of 67,005 points. The bullish momentum was on account of improvements in macroeconomic indicators after Pakistan entered into the new IMF program. Market participants also cheered the successful

completion of all IMF reviews under SBA. Moreover, the successful conclusion of elections in February 2024 brought long due clarity amongst investors. In addition, reaffirmation by the incumbent government to continue structural reforms, along with the intention to enter a longer IMF program, further uplifted sentiment. Lastly, the strength of the local currency post-crackdown on currency smuggling and hoarding, strong corporate profitability, and market expectations of monetary easing towards the end of the second half of the fiscal year, all contributed to the sustainable rally.

During 9MFY24, Foreign investors, Insurance, and Corporates were net buyers with an inflow of USD 75 million, USD 121 million and USD 31 million, respectively. While major selling was witnessed from Banks and Mutual Funds with outflow of USD 113 million and USD 55 million, respectively. During 9MFY24, average trading volumes for KSE-All Index saw an increase of 121.8% to 452 million shares compared to about 204 million shares in the same period last year. Similarly, the average trading value during the period saw a rise of 81% over the last 9M to near USD 51 million.

Banking, Fertilizer, and E&P sector were the major contributors to the index gain adding 8,799/3,504/3,350 points, respectively. Banking sector witnessed broad based rally as entry into the IMF program diminished the probability of local debt restructuring besides strong profitability. Fertilizer sector performed due to better than expected dividends while E&P rallied due to the news of clearance of gas circular debt, which would improve the sector cash flows.

FUND PERFORMANCE

During the period under review, the fund posted a return of 24.25% against 18.24% for the benchmark. The fund was 3.2% invested in Cash, 23.9% in Alhamra Islamic Stock Fund and 72.9% in Alhamra Islamic Income Fund as at March 31, 2024.

The Net Assets of the Fund as at March 31, 2024 stood at Rs. 130 million as compared to Rs. 115 million as at December 31, 2023 registering an increase of 13.04%.

The Net Asset Value (NAV) per unit as at March 31, 2024 was Rs. 124.5520 as compared to opening NAV of Rs. 110.3383 per unit as at June 30, 2023 an increase of Rs. 14.2737 per unit.

Economy & Market – Future Outlook

Pakistan GDP is expected to rebound to 2.7% in FY24 after a dismal performance last year where the GDP contracted by 0.17%. The outlook for agricultural output is optimistic, with an expected increase of 6.1%. This growth is attributed to rebound in production compared to the previous year, which was marred by heavy floods affecting crops like rice and cotton. Particularly encouraging is the notable increase in cotton arrivals, rising by 71% year-on-year to reach 8.4 million bales in the fiscal year 2024. However Industrial and services sector growth is likely to remain lackluster and will clock at 1.1% and 1.8% respectively due to overall economic slowdown amid all time high interest rates.

We expect government to enter a new long-term IMF program worth atleast USD 6 billion, after the current program expires. Successful continuation of the IMF program will be a key positive as it will allow us to tap funding from bilateral and multilateral sources. However, our external position still remains precarious as we are unlikely to issue international Eurobond or Sukuk owing to the challenging global conditions. The proceeds from FDI and RDA are also likely to remain muted owing to the current economic challenges. Thus, we would have to ensure a sustainable current account this year to stave off external concerns. We expect a CAD of USD 1.4 billion (0.4% of GDP) in FY24 and USD 3.2bn (0.8% of GDP) in FY25 as policy of consolidation is likely to continue under the IMF umbrella.

The USD PKR is expected to remain stable as the government is focusing on improving current account deficit on the back of recovery in export and remittances. Entry into the new IMF program will also increase visibility on the external funding. We expect USD/PKR to close the fiscal year around PKR 300.

The inflation reading has started to come down due to base effect and relatively stable currency. The headline inflation number in March 2024 clocked of 20.7% which was the lowest since May 2022. The core inflation also registered a significant slowdown, clocking at 15.7% which is a low of 18 months. The inflation reading is expected to decline to 18-19% by June 2024 and 13-14% by December 2024. This will allow Monetary Policy Committee to cut interest by 2% till June 2024 and around 5-6% by December 2024.

From the capital market perspective particularly equities, the market is still trading at cheap valuations. Market cap to GDP ratio is at 9.4%, a discount of 51% from its historical average of 19.1%. Similarly, Earning Yield minus Risk Free Rate is close to 9.0%, compared to the historical average of 3.0% signifying a deep discount at which the market is trading. The resolution of challenges on external account will help to unlock market potential. We believe a micro view of sectors and stocks will remain important and investment selection should focus on companies, which trade at a deep discount to their intrinsic value. The market is currently trading at PER of 4.3x, while offering a dividend yield of 11.9%.

For debt holders, we expect Money Market Funds to continue to seamlessly mirror policy rates throughout the year. Investors with a mid to long term view can benefit from Bond and Income Funds where higher duration will create opportunities for capital gains in the wake of Interest rate outlook. We have added government bonds in Income Funds to benefit from the expected monetary easing in the near term.

Mutual Fund Industry Review

The Net Assets of the open-end mutual funds industry increased by about 48.3% during 9MFY24 to PKR 2,319 billion. Total money market funds grew by about 30.0% since June 2023. Within the money market sphere, conventional funds showed a growth of 17.4% to PKR 556 billion while Islamic funds increased by 43.9% to PKR 618 billion. In addition, the total fixed Income funds increased by about 93.2% since June 2023 to PKR 714 billion while Equity and related funds increased by 35.3% to PKR 227 billion.

In terms of the segment share, Money Market funds were the leader with a share of around 50.6%, followed by Income funds with 30.8% and Equity and Equity related funds having a share of 9.8% as at the end of March 2024.

Mutual Fund Industry Outlook

Both Bonds and Equities are likely to do well in the next year on the back of cut in interest rates. During the year, significant interest of investors is already visible in Income Funds while equity fund is likely to see inflows post new IMF agreement. Relatively High interest rates during the period would encourage sustained flows in the money market funds as they are ideal for investors with a short-term horizon and low risk profile. Our operations remained seamless and given our competitive edge in digital access and online customer experience, we are prepared to get benefits of the growing number of investors available online.

پاکتان کی مجموع ملکی پیداوار (جی ڈی پی) گزشتہ سال مایوس کن کارکردگی (0.17 فیصد کمی) کے بعد مالی سال 2024ء میں متوقع طور پر بحال ہوکر 2.7 فیصد ہوجائے گی۔ زرعی پیدوار کا مستقبل امیدافزا ہے اور اس میں 6.1 فیصد کی ترقی متوقع ہے کیونکہ پیداوار گزشتہ سال کے مقابلے میں بحال ہوئی ہے جب شدید سیلا بول نے چاول اور کیاس جیسی فصلوں کو بھاری نقصان پہنچایا تھا۔ خاص طور پر حوصلہ بخش بات کیاس کی پیداوار میں قابلِ ذکر اضافہ ہے جو 71 فیصد سال در سال (۲۰۷) بڑھ کر مالی سال 2024ء میں 8.4 ملکین گاٹھیں ہوگئے۔ تا ہم صنعت اور خدمات کے شعبوں کی ترقی ماندر ہے کا امکان ہے جو بالتر تیب 1.1 فیصد اور 1.8 فیصد ہوگی ، اور اس کے عوامل مجموعی طور پر معاشی سے رفتاری اور سود کی شرحوں کی بلندتر بن سطین ہیں۔

ڈالراورروپے کا تناسب منظم رہنے کا امکان ہے کیونکہ حکومت برآ مدات اور ترسیلات میں بحالی کی بنیاد پر کرنٹ اکا ؤنٹ خسارہ کم کرنے کی طرف توجہ دے رہی ہے۔ بڑے آئی ایم ایف پروگرام میں داخل ہونے سے بھی خارجی محاذ پر حصولِ رقم کی صورتحال واضح ہوگی۔ ہمیں توقع ہے کہ مالی سال کے اختیام پر ڈالراورروپے کا تناسب تقریبًا 300 ہوگا۔

14 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

14.1 Fair value hierarchy

International Financial Reporting Standard IFRS 13 - "Fair Value Measurement" requires the fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: quoted prices in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and prices); and

Level 3: inputs for the assets or liability that are not based on observable market data (i.e. unobservable inputs).
