March 31, 2025
PERSPECTIVE

Economy Review & Outlook

During the month, the IMF team reached a staff-level agreement (SLA) with the Pakistani authorities on the first review of the 37-month Extended Fund Facility (EFF) arrangement, as well as on a new 28-month program under the Resilience and Sustainability Facility (RSF), providing access to approximately USD 1.3 billion. The agreement remains subject to approval by the IMF Executive Board. Following this, an IMF delegation is expected to visit Pakistan to support the preparation of the federal budget for the 2025–26 fiscal year.

The country's exports during March 2025 increased by 5.1% month on month (MoM) to USD 2.62 billion, while imports declined by 1.1% to USD 4.74 billion, narrowing the trade deficit by 7.8% to USD 2.1 billion. With bumper remittances expected due to inflows during Ramadan, the country may witness a significant current account surplus for the month. The cumulative current account surplus in the first eight month of Fiscal year 2025 stands at USD 691mn with Pakistan poised to post the first annual current account surplus since FY11. SBP reserves witnessed a dip of around USD 550mn to USD 10.7bn during the month as the country retired some of its foreign debts. The local currency depreciated slightly by 0.2% against the greenback to close at 280.2 level.

CPI based inflation for March 2025 clocked at 0.69% down from 1.52% witnessed in February 2025 mainly due to base effect. This was the lowest reading since December 1965 (0.58%). The core inflation clocked at 9.0% similar to last month. We expect some uptick in inflation from this low base by the end of fiscal year. We anticipate CPI to average around 5.1% in FY25 compared to 23.4% in FY24. On the fiscal side, FBR tax collections rose by 26.8% in the first nine months of FY25, reaching PKR 8,452 billion—falling short of the target by PKR 716 billion.

Money Market Review & Outlook

The short-term secondary market yields increased by 31 bps while longer tenor yields rose by 15 bps during the month. The yields inched up as SBP maintained status quo in the monetary policy held on 10 March 2025 against mixed market expectations. SBP kept interest rate unchanged as they felt that core inflation is proving to be more persistent at an elevated level and thus uptick in the food and energy prices may lead to increase in inflation.

SBP conducted the Treasury bill auction on March 26, 2025. The auction had a total maturity of PKR 412 billion against a target of PKR 650 billion. SBP accepted total bids worth PKR 226 billion in 1 months, PKR 111 billion in 3 months, PKR 74 billion in 6 months and PKR 195 billion in 12 months' tenors at a cut-off yield of 12.39%, 12.01%, 12.00% and 12.01% respectively. The cut off yields were up by an average of 29bps from the auction conduction last month. The auction for fixed coupon PIB bonds was held on March 12, 2025. The auction had a total maturity of 70 billion against a target of PKR 350 billion. SBP accepted bids worth PKR 6 billion in 5 Years and PKR 10 billion in 10 years at a cut off rates of 12.37% and 12.79%, respectively.

Since June 2024, the State Bank of Pakistan (SBP) has reduced interest rates by a cumulative 1,000 basis points, bringing the policy rate down from a peak of 22.0% to 12.0%. The recent sharp decline in global oil prices may exert further downward pressure on inflation. However, while the inflation and import outlook has improved, this could be offset by potential weakness in exports and remittances amid ongoing global economic uncertainty. We expect the SBP to closely monitor these evolving dynamics and make policy decisions aimed at balancing macroeconomic stability and growth. For now, we anticipate interest rates to remain at current levels in the near term. However, if incoming data surprises on the upside, there is potential for an additional 100bps rate cut later in the calendar year.

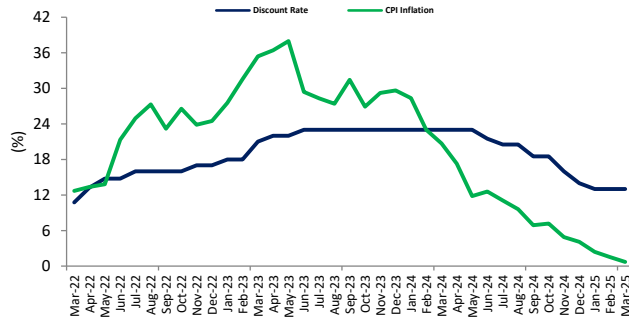

Equity Market Review & Outlook

March 2025 proved to be a strong month for the KSE-100 Index, which hit a new all-time high of 118,769 points, delivering a monthly return of 4.9%. The rally was initially fueled by news of a subsidized debt resolution agreement between the Government of Pakistan (GoP) and commercial banks to address PKR 1.2 trillion in Circular Debt. Investor sentiment was further uplifted by Moody's upgrade of Pakistan's banking sector outlook from Stable to Positive. Additionally, the staff-level agreement between Pakistan and the IMF under the EFF, along with the approval of a USD 1.3 billion RSF arrangement, added to the market's momentum. However, some profit-taking towards month-end led the index to close at 117,807 points, reflecting a 4.0% gain on a month-on-month basis.

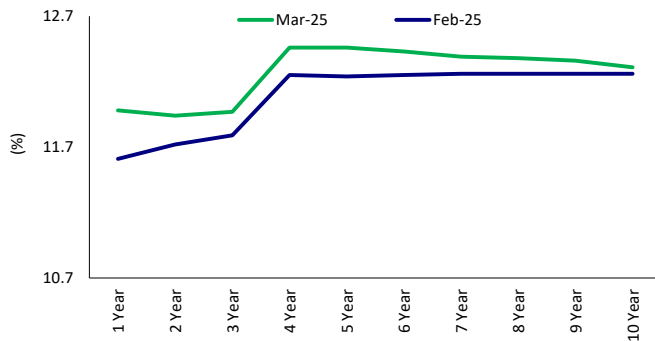

The market activity weakened due to short trading hours during Ramzan as average traded volume decreased by 28.9% MoM to 366mn shares while the average traded value declined by 1.1% MoM to USD 87mn. On the flows front, foreign investors remained net sellers, recording a net outflow of USD 12.0 million. Among local participants, Mutual Funds and Insurance emerged as net sellers. Meanwhile, buying activity was observed from Banks/DFIs. On the Sectoral Front, major contribution came from E&P, OMCs and Banks which added 2,048, 762, and 631 points, respectively. While negative contribution was seen from Fertilizer, Leather, and Investment Companies with cumulative points contribution of 631 points.

In the short-term market participants will closely monitor global macroeconomic and political situation following the imposition of sweeping tariffs by the United States on imports from the rest of the world. This has already caused a rout in global equities and commodity markets. Timely resolution of the tariff war can lead to market recovery while prolonged uncertainty can lead to further bearish trend. We re-iterate our stance as the market is still trading at a discount from historical levels, evident from a forward Price to Earnings ratio of 6.5x and a dividend yield of 8.3%. These attractive valuations present compelling opportunities for investors with a medium to long-term horizon.

Investment Objective

To generate risk adjusted returns by investing in short, medium and long-term Shariah Compliant Fixed Income instruments.

Manager's Comment

During the month, the fund generated an annualized return of 3.70% against its old benchmark return of 8.52% and new benchmark return of 10.47%. WAM of the fund was 2 years at month end.

In order to maintain a strong credit profile, the fund has been prudent in its risk policies and has avoided taking exposure in a number of weak credit corporate debt instruments offering a higher yield including some from power, banking, microfinance and miscellaneous sectors.

In case your complaint has not been properly redressed by us, you may lodge your complaint with SECP at the link https://sdms.secp.gov.pk/. However, please note that SECP will entertain only those complaints which were at first directly requested to be redressed by the Company and the Company has failed to redress the same. Further, the complaints that are not relevant to SECP's regulatory domain/competence shall not be entertained by the SECP.

DISCLAIMER

This publication is for informational purposes only and nothing herein should be construed as a solicitation, recommendation or an offer to buy or sell any fund. All investments in Voluntary Pension Schemes are subject to market risks. The NAV based prices of units and any dividends/returns thereon are dependant on forces and factors affecting the financial markets. These may go up or down based on market conditions. Past performance is not necessarily indicative of future results. Performance data does not include the cost incurred directly by an investor in the form of sales loads etc.
