September 30, 2026

PERSPECTIVE

Economy Review & Outlook

Pakistan's exports increased by 17.6% YoY in September 2026 to USD 2.9 billion, while imports rose by 11.1% YoY to USD 6.5 billion. Consequently, the trade deficit widened by 6.2% YoY to USD 3.6 billion. During the month, Pakistan and the IMF continued negotiations for the fourth review under the EFF and the review of the RSF facility, successful completion of which is expected to unlock approximately USD 1.2 billion in financing. Meanwhile, SBP's foreign exchange reserves increased to an all-time high of USD 21.4 billion. The Pakistani Rupee also maintained its positive momentum for the fifteenth consecutive month, appreciating marginally by 0.1% MoM to close at PKR 277.1/USD.

On the inflation front, headline CPI inflation eased to 10.26% YoY in September 2026 from 11.15% in August 2026, while core inflation moderated to 8.40% from 8.68% in the previous month. We expect average CPI inflation to settle at around 8.9% in FY27, compared with 7.0% in FY26. However, the inflation outlook remains highly sensitive to geopolitical developments and movements in international oil prices. On the fiscal front, FBR tax collection increased by 6.7% YoY during 1QFY27 to PKR 3,083 billion, exceeding the cumulative target by PKR 30 billion.

Money Market Review & Outlook

Secondary market yields increased across the curve during the month, with short-term yields rising by 16 bps and long-term yields increasing by 74 bps. The upward movement was primarily driven by a rebound in international oil prices following renewed geopolitical tensions in the Middle East. At its meeting on September 14, 2026, the Monetary Policy Committee (MPC) maintained the policy rate at 11.5%. The Committee noted that the intensification of the prolonged Middle East conflict had led to a further increase in already elevated global commodity prices. However, external account pressures remained contained, supported by robust workers' remittances and higher financial inflows. Against this backdrop, the MPC assessed that the prevailing monetary policy stance remained appropriate to steer inflation toward the medium-term target range of 5–7%.

SBP conducted the Treasury bill auction on September 30, 2026, with total maturities of PKR 743 billion against a target of PKR 700 billion. The central bank accepted bids worth PKR 232 billion in the 1-month tenor, PKR 467 billion in the 3-month tenor, PKR 99 billion in the 6-month tenor, and PKR 55 billion in the 12-month tenor at cut-off yields of 11.68%, 11.99%, 12.45%, and 12.49%, respectively. Meanwhile, the fixed-rate PIB auction was held on September 18, 2026, with total maturities of PKR 284 billion against a target of PKR 250 billion. SBP accepted bids worth PKR 18 billion in the 2-year tenor, PKR 64 billion in the 3-year tenor, PKR 72 billion in the 5-year tenor, and PKR 27 billion in the 10-year tenor at cut-off yields of 12.40%, 12.49%, 12.49% and 12.50%, respectively.

Going forward, developments in the Middle East and their implications for international oil prices are likely to remain key drivers of Pakistan's inflation, external account, and monetary policy outlook. Accordingly, we expect the central bank to maintain a data-dependent approach in shaping upcoming policy decisions.

Equity Market Review & Outlook

The benchmark KSE-100 Index came under renewed pressure during September 2026, declining by 7,006 points, or 4.0% MoM, to close the month at 169,969 points. Market sentiment weakened amid escalating US-Iran tensions and stalled peace negotiations, which pushed international oil prices higher and revived concerns over Pakistan's inflation and external account outlook. Arab Light crude rose 15.1% MoM to USD 98.3/bbl by month-end, after briefly crossing USD 110/bbl during the month. On the domestic front, rising political tensions further added to investor uncertainty, although this was partly offset by SBP foreign exchange reserves reaching an all-time high.

During September 26, average daily traded volume decreased by 24.4% to 603.85 million shares, while average daily traded value declined by 34.5% to USD 88.9 million amid worsening geopolitical environment. On the flows front, foreign investors remained net sellers, recording an outflow of USD 17.7 million. While on local front, Mutual Funds and Brokers remained net sellers with selling of USD 42.6million and USD 8.9million, respectively. On the contrary, the selling was largely absorbed by Individuals and Companies, which collectively recorded a net inflow of USD 56.8 million.

From a sectoral perspective, Commercial Banks, Cement, and Power Generation & Distribution were the largest drags on the KSE-100 Index, collectively contributing a decline of 4,085 points. This was partially offset by gains in Miscellaneous, Insurance, and Property, which cumulatively contributed 126 points to the index.

Looking ahead, market performance is expected to remain sensitive to developments in the Middle East and their implications for global commodity prices and Pakistan's external account. Domestically, investors are likely to closely monitor developments on the political front, the ongoing fourth IMF review, the State Bank of Pakistan's monetary policy trajectory, and the sustainability of the improving macroeconomic fundamentals. Nonetheless, we maintain a positive outlook on equities, supported by continued progress on the reform agenda, improving sovereign fundamentals, and attractive market valuations. As of end-September, the benchmark index was trading at a forward Price-to-Earnings ratio of 7.3x, while offering a dividend yield of 6.8%.

Investment Objective

The objective of ALHIIF is to generate risk adjusted returns by investing in short, medium and long-term Shariah Compliant Fixed Income instruments.

Manager's Comment

During the month, the fund generated an annualized return of -3.79% against benchmark return of 9.60% . WAM of the fund was 1.86 years at month end.

In order to maintain a strong credit profile, the fund has been prudent in its risk policies and has avoided taking exposure in a number of weak credit corporate debt instruments offering a higher yield including some from power, and miscellaneous sectors .
