Such suspension may, however, not affect existing subscribers. AHIML will also announce the details of exemptions at the time a suspension of dealing is announced. AHIML will immediately notify the Commission if dealing is suspended and will also have the fact published, immediately following such decision, in the newspaper in which the Pakistan Islamic Pension Fund's Unit prices are normally published.

6.13 REFUSAL TO ACCEPT CONTRIBUTION

AHIML or the Distribution Companies may, at any time, refuse to accept a Contribution in any of the following cases:

- a) In case the Contribution is contrary to the Know-Your-Customer (KYC) Rules or policy of the Pension Fund Manager or any other Money Laundering Rules that the Pakistan Islamic Pension Fund may be subject to or that the Pension Fund Manager may frame for self-regulation.
- b) In case the Contribution is from a Participant who does not have a valid National Tax Number.
- c) In case the Contribution is from a Participant who does not have a valid CNIC/NICOP Number.
- d) In case the Contribution is contrary to the rules of the foreign jurisdiction that the Pakistan Islamic Pension Fund or the Participant may be subject to or if accepting the Contribution may subject the Pakistan Islamic Pension Fund or the Pension Fund Manager to additional regulations under the foreign jurisdiction.
- e) If accepting the Contribution would, in any case, be contrary to the interests of the Pension Fund Manager or the Pakistan Islamic Pension Fund or the Participants.

6.14 CIRCUMSTANCES OF SUSPENSION OF WITHDRAWALS OR TRANSFERS

The withdrawals or transfers from Pakistan Islamic Pension Fund may be suspended or deferred during extraordinary circumstances including war (declared or otherwise), natural disasters, a major break down in law and order, breakdown of the communication system, closure of one or more Stock Exchange on which any of the Securities invested by the Pakistan Islamic Pension Fund are listed, closure of the banking system or strikes or other events that render the Pension Fund Manager or the Distributors unable to function, or the existence of a state of affairs which, in the opinion of the Pension Fund Manager, constitutes an emergency, as a result of which disposal of any investment would not be reasonably practicable or might seriously prejudice the interests of the Pakistan Islamic Pension Fund or of the Participants, or a break down in the means of communication normally employed in determining the price of any Investment, or when

remittance of money can not be carried out in reasonable time and if the Pension Fund Manager is of the view that it would be detrimental to the remaining Participants to redeem Units at a price determined in accordance with the Net Asset Value. Such a measure will be taken to protect the interests of the Participants in the event of extraordinary circumstances or in the event redemption requests accumulate in excess of ten percent of the Units in issue. In the event of a large number of redemption requests accumulating, the requests may be processed in a Queue System.

- 6.14.1 Such suspension or Queue System will end on the day following the first Business Day on which the conditions giving rise to the suspension or Queue System will, in the opinion of the Pension Fund Manager, have ceased to exist and no other condition, under which suspension or Queue System is authorized under the Deed, exists. In case of suspension and invoking of a Queue System and end of suspension and Queue System, the Pension Fund Manager will immediately notify the Commission and publish the same in at least one daily news paper circulating in Karachi, Lahore and Islamabad.

6.15 QUEUE SYSTEM

In the event redemption requests on any day exceed 10% of the Units in issue of a Sub-Fund the Pension Fund Manager may invoke a Queue System, whereby requests for withdrawals or transfers will be processed on a 'first- come- first served' basis for up to 10% of the Units of the Sub-Fund in issue. The Pension Fund Manager will proceed to sell adequate assets of the Sub-Fund and/ or arrange borrowing, as it deems fit, in the best interests of the Participants, and will determine the Net Assets Value to be applied to the withdrawal or transfer requests based on such action. Where it is not practical to determine the chronological ranking of any requests in comparison to others received on the same business day, such requests will be processed on a proportional basis, proportionate to the size of the requests. The requests in excess of the 10% will be treated as requests qualifying for being processed on the next business day at the price to be determined for such requests. However, if the carried over requests and the fresh requests received on the next business day still exceed 10% of the Units in issue, these will, once again, be treated on a 'first-come-first-served' basis and the process for generating liquidity and determining the redemption price will be repeated and such procedure will continue till such time the outstanding redemption requests come down to a level below 10% of the Units then in issue.

6.16 WINDING UP IN VIEW OF MAJOR REDEMPTIONS

If AHIML is of the view that the quantum of withdrawal or transfer requests that have built up will result in the Pakistan Islamic Pension Fund being run down to an unmanageable level or it is of the view that the sell-off of assets is likely to result in a significant loss in value for the Participants who are not redeeming, in such an event, the queue system, if already invoked, will cease to apply and the Pension Fund Manager may apply to the Commission for the transfer of the records, accounts and books along with the management of the Pakistan Islamic Pension Fund to another Pension Fund Manager.

6.17 FEATURES OF GROUP INSURANCE/TAKAFUL IN THE PAKISTAN ISLAMIC PENSION FUND

6.17.1 In future, the Pakistan Islamic Pension Fund may be marketed in conjunction with Group Life Insurance or any other insurance scheme/takaful and the Trustee is authorized to deduct any insurance premium from the contributions and deposit it, with the relevant insurance company if the contribution includes any amount of insurance premium. However, it should be clearly understood that it is not mandatory for the Participants to opt for the insurance scheme/takaful.

6.17.2 In the event the Subscriber opts for an insurance/takaful cover with one of the insurance/takaful companies, the Subscriber will send the amount of the applicable premium alongwith his contribution. The Trustee will pass on the premium to the insurance/takaful company concerned as a free service to the Subscriber.

9.0 RISK DISCLOSURE

All investments in Pakistan Islamic Pension Fund are subject to market risks. The value of such investments may depreciate as well as appreciate, subject to market fluctuations and risks inherent in all such investments. Investors should read this Offering Document carefully to understand the investment policies, risks and tax implications and should consult their legal, financial or tax advisors before making any investment decision. Withdrawals from the Pension Fund before the retirement age are subject to tax.

PIPF will be investing in equity securities listed on the Stock Exchanges and also in fixed income securities including deposits with Banks. Such investments are subject to varying degree of risks that include, but are not limited to:

- (a) **Business Risk:** This is the uncertainty of income flows caused by the nature of a firm's business. It includes: (i) Change in business cycles affecting the business of the company in which the investment is made; (ii) Change in business circumstances of the company, its business sector, industry and/or the economy in general; and (iii) Mismanagement of the investee company, third party liability through class action or occurrence of other events such as strikes, fraud etc., in the company in which the investment was made.
- (b) **Equity Risk:** Investment in equity securities are subject to price risk, which is dependant on a multiple of factors, including the profitability/ performance of investee companies, technological development, which may render the processes of investee companies obsolete, Government regulations, economic and political situation within the country, region and internationally. As a result of these factors, the dividend income and the share price of equity securities may go up as well as down.
- (c) **Volatility in Market Price Risk:** Volatility in prices resulting from their dependence on market sentiment, speculative activity, supply and demand for the securities and liquidity in the market. The volatility in securities prices results in volatility in the NAV based price of the Unit.
- (d) **Liquidity Risk:** Some securities listed at the Stock Exchanges are illiquid and difficult to sell. Liquidity Risk is the uncertainty introduced by the secondary market for an investment and assesses: 1) How long it takes to convert the investment into cash. 2) How certain is the price to be received. It is effected by: (i) Volatility in shares prices resulting from their dependence on market sentiment, speculative activity, supply and demand for the shares and the liquidity in the market; and (ii) Increase in lending rates as a result of a change in the supply and demand of liquidity in the market or on account of an increase of the underlying inflation rate.

- (e) **Credit Risk:** These include default risk, credit spread risk, and down grade risk. These risks are associated with fixed income securities. Default risk will involve possibility of non payment of mark up or principal. Credit spread risk will involve increase in difference of mark up rate of an issuer and Government Securities. Such increase is due to macro economic factors in local as well as global markets. Increase in spread will result in decrease in value of fixed income securities. Down grade risk means lower rating by credit rating agencies and will result in decrease in value of fixed income securities.
- (f) **Financial Leverage Risk:** This is the uncertainty induced by the method by which the firm finances its investments. If a firm borrows money to finance investments, it must pay fixed financing charges (in the form of interest to creditors) prior to providing income to the common stockholders. It includes: (i) Senior rights of creditors over shareholders of the company in the event of winding up; (ii) The inability of the issuer of the instrument, the relevant financial institution or the counter party in the case of reverse repurchase or other arrangements to fulfill their obligations; and (iii) The possibility of defaults by participants or failure of stock exchanges, the depositories, the settlement or clearing system.
- (g) **Interest Rate Risk:** This arises due to increase in lending rates as a result of a change in the supply and demand of liquidity in the market or on account of an increase in the underlying inflation rate. An increase in the interest rates will result in decrease in value of fixed income securities, including Government Securities.
- (h) **Country or Political Risk:** This is the uncertainty of returns caused by the possibility of a major change in the political or economic environment of the country such as break down of law and order, war, natural disasters, etc. and any governmental actions, legislative changes or court orders restraining payment of principal or income.
- (i) **Purchasing Power Risk:** This is the risk of loss in the value of capital due to inflation.
- (j) **Inflation Risk:** This is the possibility that the value of assets or income will decrease as inflation shrinks the purchasing power of a currency. Inflation causes money to decrease in value at some rate, and does so whether the money is invested or not. It is the risk associated with the return from an investment not covering the loss in purchasing power caused by inflation.

Capital invested in the stock market could, in extreme circumstances, lose its entire value. However, studies show that diversification of the investment reduces the risk associated with investing in the stock market.

The Units of Sub-Funds are not bank deposits and are neither issued by, insured by, or the obligation of the Commission, any Government agency, any of the shareholders or the Pension Fund Manager or any other bank or financial institution.
