The Pension Fund Manager may with the consent of the Trustee and intimation to the Commission suspend withdrawal from any of the Sub Funds, subject to the Rules at any time during:

- (a) Extraordinary circumstances including war (declared or otherwise), natural disasters, a major breakdown in law and order, breakdown of the communication system, closure of Stock Exchange on which any of the Securities invested in by the Pension Fund are listed, closure of banking system or strikes or other events that render the Pension Fund Manager or the Distributors unable to function;
- (b) The existence of a state of affairs, which in the opinion of the Pension Fund Manager, constitutes an emergency as a result of which disposal of any Investment would not be reasonably practicable or might seriously prejudice the interests of the Pension Fund or of the Participants;
- (c) Break down in the means of communication normally employed in determining the price of any Investment; or
- (d) When remittance of money cannot be carried out in reasonable time and if the Pension Fund Manager is of the view that it would be detrimental to the remaining Participants to withdraw Units at a price so determined in accordance with the Net Asset Value (NAV); and
- (e) Execution of withdrawal of Units on any Dealing Day would result in more than ten percent (10%) of the issued Units of any Sub-Fund being withdrawn; provided that any suspension or deferral of withdrawal of Units shall not affect any Approved Income Payment Plans.

The Pension Fund Manager may announce, with the consent of the Trustee and intimation to the Commission, a suspension or deferral of withdrawal and such a measure shall be taken to protect the interest of the Participants in the event of extraordinary circumstances or in the event withdrawal requests accumulate in excess of ten (10) per cent of the Units of the pertinent Sub-Fund in issue or ten (10) per cent of the pertinent Sub-Fund's NAV. In the event of a large number of withdrawal requests accumulating, the requests may be processed in a Queue System and under extreme circumstances the Pension Fund Manager may decide to wind up the Pension Fund by transferring the assets and records to another Pension Fund Manager with the Prior approval of the Commission.

Such suspension or queue system shall end on the day following the first Business Day on which the conditions giving rise to the suspension or queue system shall in the opinion of the Pension Fund Manager have ceased to exist and no other condition under which suspension or queue system is authorized under the Constitutive Documents exists. In case of suspension and invoking of a queue system and end of suspension and queue system the Pension Fund Manager shall immediately notify the Commission and the Trustee and inform the Participant through its website and participant's respective email addresses.

6.23 Queue system

In the event withdrawal requests on any day exceed 10% of the Units in issue of a Sub-Fund the Pension Fund Manager may invoke a Queue System, whereby requests for withdrawals or transfers will be processed on a 'first- come- first served' basis for up to 10% of the Units of the Sub-Fund in issue. The Pension Fund Manager will proceed to sell adequate assets of the Sub-Fund and/ or arrange borrowing, as it deems fit, in the best interests of the Participants, and will determine the Net Assets Value to be applied to the withdrawal or transfer requests based on such action. Where it is not practical to determine the chronological ranking of any requests in comparison to others received on the same business day, such requests will be processed on a proportional basis, proportionate to the size of the requests. The requests in excess of the 10% will be treated as requests qualifying for being processed on the next business day at the price to be determined for such requests. However, if the carried over requests and the fresh requests received on the next business day still exceed 10% of the Units in issue, these will, once again, be treated on a 'first-come-first-served' basis and the process for generating liquidity and determining the withdrawal price will be repeated and such procedure will continue till such time the outstanding withdrawal requests come down to a level below 10% of the Units then in issue.

- 6.24.3 In the event the Pension Fund Manager is of the view that the quantum of withdrawal requests that have built up shall result in the Sub-Funds or the Pension Fund being run down to an unmanageable level or it is of the view that the sell-off of assets is likely to result in a significant loss in value for the Participants who are not withdrawing, it may apply to the Commission to de-authorize the Pension Fund. In such an event, the queue system, if already invoked, shall cease to apply.
- 6.24.4 The Pension Fund may also be de-authorized by the Commission on the grounds provided in the Rules.
- 6.24.5 Upon the Pension Fund being de-authorized, the Pension Fund Manager shall suspend receiving contributions forthwith from any of the Participants from the date of issue of the notice under this clause, proceed to transfer all the records of Individual Pension Accounts and books of accounts of the Pension Fund to another pension fund manager.

The Trustee with the prior

approval of the Commission shall decide the cost of such interim audit and the same shall be charged to the Pension Fund with the prior approval of the Commission.

The Pension Fund Manager is responsible for the investment and disinvestment of property of the Alhamra Islamic Pension Fund. However, every Participant will decide about his investment in the units of the Sub-Funds by using his preference for the selection of the Allocation Plan. The participant will select **any one of the approved Allocation Schemes** for allocation of his contributions between the Sub-Funds. Thus, contribution from the Participants will be allocated between the Sub-Funds as per the particular Allocation Scheme selected by the Participants.

8.9 Investment Risk Disclosure and Tax Implication

The Pension Fund Manager shall ensure that effective risk control measures are in place for the protection of the participants.

Participants must realize that all investments in Islamic pension Fund and securities are subject to market risks. Our target return cannot be guaranteed and it should be clearly understood that the portfolio of the Fund is subject to market price fluctuations and other risks inherent in all such investments. The risks emanate from various factors that include, but are not limited to:

- (1) **Equity Risk:** Share prices are generally volatile and may go up or down because of their dependence on market sentiments, speculative activity, supply and demand for the shares and liquidity in the market. Mutual funds that purchase shares become part owners in the companies. The companies' performance, domestic and/or industry outlook with respect to technological and consumer behavior dynamics, market activity and the larger economic scenario influence the price of these shares. Moreover, lack of trading in the investee companies' securities may result in liquidity crisis. When the economy is expanding, the outlook for many companies is positive and the value of these shares may rise, and vice versa. Share prices are also affected by the quality of the management of investee companies.
- (2) **Government Regulation Risk-** Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
- (3) **Credit Risk-** Credit Risk comprises default risk, credit spread risk and down grade risk. Each can have negative impact on the value of the income and money market instruments including Sukuks etc.

- (4) **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;
- (5) **Country or Political Risk** – The uncertainty of returns caused by the possibility of a major change in the political or economic environment of the country such as break down of law and order, war, natural disasters, etc. and any governmental actions or legislative changes or court orders restraining payment of principal or income.
- (6) **Price Risk**- The price risk is defined as when the value of the Fund, due to its holdings in such securities rises and falls as a result of change in interest rates.
- (7) **Liquidity Risk** – Liquidity risk is the possibility of deterioration in the price of a security in the Fund when it is offered for sale in the secondary market.
- (8) **Settlement Risk**– At times, the Fund may encounter settlement risk in purchasing / investing and maturing / selling its investments which may affect the Fund’s performance etc.
- (9) **Reinvestment Rate Risk** – In a declining interest/ markup rate economic environment, there is a risk that maturing securities or coupon payments will be reinvested at lower rates, which shall reduce the return of the Fund compared to return earned in the preceding quarters.
- (10) **Sovereign Risk**- Payment of bonds/ notes may be affected by the economic and political events in the country of the relevant issuer. The occurrence of a sovereign risk event could result in the loss of all or a portion of the principal invested, as a result of any economic or political circumstance.
- (11) **Events Risk**- There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in tax law.
- (12) **Withdrawal Risk**- There may be special circumstances in which the withdrawal of Units may be suspended or the withdrawal payment may not occur within six working days of receiving a request for withdrawal from the participant.
- (13) **Shariah non-compliance Risk**: The risk associated with employing funds in investments that are not consistent with the Principles of Shariah.

8.10 Other Risks Involved:

- (a) Mismanagement of the investee company, third party liability whether through class action or otherwise or occurrence of other events such as strikes, fraud etc., in the company in which the investment is made.
- (b) Breakdown of law and order, war, terrorist activity, natural disasters etc.
- (c) Senior rights of some stake holders over other stake holders in the event of winding up.

- 8.10.1 Under exceptional (extraordinary) circumstances, the Pension Fund Manager may suspend withdrawal, invoke a queue system or announce winding-up of the Fund. In such events, the participant will probably have to wait for payment beyond the normal period and the withdrawal amount so determined may be lower than the price at the time the withdrawal request was lodged. Participants are advised to read the relevant clauses of the Fund's Trust Deed for more detailed information regarding this clause.
- 8.10.2 Risk specific to foreign investments: The Fund may invest outside Pakistan & such investments may be exposed to additional risks including political, economic & exchange rate risks that may reduce the value of the investments. However, evidence shows that diversifying internationally tends to reduce the overall volatility of the portfolio and thus may reduce risks for participants.
- 8.10.3 Investment in the Islamic Pension Fund is suitable for participants who have the ability to take the risks associated with financial and capital market investments. Capital invested in the financial and capital markets could, in extreme circumstances, lose its entire value. However, diversification of the investment into a number of highly liquid equities, income securities and repurchase transactions tends to reduce the risk substantially. The historical performance of the Funds, the financial and capital market or that of any one security or transaction included in the Fund's portfolio does not indicate the future performance.
- 8.10.4 There may be times when a portion of the investment portfolio of the Scheme is not compliant either with the investment policy or the minimum investment criteria of the assigned 'Category'. This non-compliance may be due to various reasons including, adverse market conditions, liquidity constraints or investment-specific issues. Participants are advised to study the latest Fund Manager Report specially portfolio composition and Financial Statements of the Scheme to determine what percentage of the assets of the Scheme, if any, is not in compliance with the minimum investment criteria of the assigned Category. The latest monthly Fund Manager Report as per the format prescribed by Mutual Funds Association of Pakistan (MUFAP) is available on the website of the Pension Fund Manager (PFM) and can be obtained by calling / writing to the PFM.
- 8.10.5 There may be times that one or more investments made by the fund may cease to be, either temporarily or permanently, compliant with the requirements of Shariah. In this case, such investments will immediately be brought in the knowledge of the Shariah Advisor and steps will be taken to dispose-off or otherwise make the portfolio compliant with the requirements of Shariah as per the guidance of the Shariah Advisor.

INCOME PAYMENT PLAN OFFERED BY MCB INVESTMENT MANAGEMENT LIMITED ALHAMRA ISLAMIC PENSION FUND- ALHIPF

Introduction

At the retirement age, the participants under the Voluntary Pension System have the option to buy an Approved Annuity Plan from a life insurance company or an Approved Income Payment Plan from a Pension Fund Manager.

Income Payment Plan which is also known as Income Drawdown Plan provides an option to the participant to defer purchasing an annuity (an income for life) until several years into retirement. The Plan allows receiving a regular income from the accumulated balance in the Individual Pension Account over the term decided by the participant while it stays invested with the Pension Fund Manager.

Risk Disclosure

Income Payment Plan avoids purchasing an annuity until the age of 75 by leaving accumulated balance invested in a range of assets. Participants must recognize that all investments involve varying levels of risk. The portfolios of the Sub-Funds consist of market-based investments and are subject to market fluctuations and risks inherent in all such investments and the value of Units of the Sub-Funds can fall as well as rise. It should also be noted that future annuity rates could be lower or higher than those available today, Income Payment Plan maintains the risk on the investor as opposed to a traditional pension annuity where the investment risk is taken on by the insurance company offering the annuity. The participants should read the Offering Document carefully to understand the investment policies, risks and tax implication and should consult legal, financial or tax adviser before opting for the Income Payment Plan.

Income Payment Plan offered by MCB Investment Management Limited is as follows:

1. Options at retirement

When the Participant decides on his retirement age which can be any date between sixty and seventy years, the Participant is required to inform the Pension Fund Manager the chosen date of retirement by completing the prescribed Retirement Option Form (Form AHI-VPS-06) and submitting it at the Authorized Branch or office of the Distribution Companies at least thirty days before the chosen date of Retirement.

Participants have the following options:

- (a) Withdraw up to 25% of the amount in his/her Individual Pension Account as cash, without being charged for tax on this amount
- (b) Use the remaining amount to purchase an Approved Annuity Plan from a life insurance company of his/her choice; or,
- (c) To enter in to an agreement with the Pension Fund Manager to withdraw from the remaining amount, monthly instalments till the age of 75 years or earlier, according to an Income Payment Plan, approved by the Commission.

The scheme provides every Participant an option to withdraw as tax-free lump-sum up to 25% of the balance in the Individual Pension Account. However, the more cash is withdrawn as tax-free lump-sum, the lesser pension shall be available from the Income Payment Plan during retirement and vice versa. Further it is not necessarily that every Participant needs full 25% of cash lump-sum at retirement. Lower the amount of lump-sum withdrawn, higher will be the pension payments. Furthermore the tax rate applicable on pension payment is likely to be lower than the tax rate on full income prior to retirement.

2. Eligibility

A Participant would be eligible to opt for an Income Payment Plan, at any time, after achieving the retirement age, as referred in clause (c) of Para 1 above. However, the participant can not opt for the Income Payment Plan if he has already purchased an Approved Annuity Plan from a life insurance company.

3. Features and Mechanics of the Income Payment Plan

When the Participant decides to start taking pension benefits, the participant first decides whether he/she wants to take a tax free cash sum. If the Participant decides to draw tax free cash, the sum of cash is transferred to the respective bank account of the participant and the balance amount breaks down into **two parts**: i.e. Part-A and Part-B:

Part A: Invests in the approved **ALHIPF Debt Sub-Fund** that *targets* to earn at least inflation, to provide a regular and stable real income (purchasing power) every month throughout drawdown period.

A portion of Part-A which will be used to pay current year monthly pensions, will be invested in the approved **ALHIPF Money-Market Sub-Fund** to further reduce volatility.

The portion of the Individual Pension Account to be placed in Part A will be calculated as follows:

$$\text{Part A} = \frac{\text{Accumulated Balance} * (\text{Age till Termination of IPP less retirement age})}{\text{Years to live after retirement (Assumed as per average Life Expectancy)}}$$

For this purpose the insurance company assumes a life-expectancy of 85 years for an individual aged 75 (willing to purchase an annuity).

Each month a payment is withdrawn from this accumulated balance (in ALHIPF Money Market Fund) according to the following formula:

$$\text{Pension Payment} = \frac{\text{accumulated balance at beginning of the month}}{\text{No. of drawdown payments remaining for the year}}$$

Two things are evident from this formula:

- This would ensure that Part A reduces to zero by the end of the drawdown period and not before that. At end of the Drawdown period, an Approved Annuity Plan will be purchased with the balance in Part B.
- Monthly Pension will not remain constant throughout, instead is expected to increase each month due to the investment income earned on money market investments.

Monthly Payments under the Income Payment Plan shall be subject to tax at the then tax rates applicable to that individual.

Part B: Invests in the approved **ALHIPF Equity Sub-Fund and ALHIPF Debt Sub- Fund** till termination of Income Payment Plan. At the time of termination of Income Payment Plan, total balance in this Part shall be used to purchase an Approved Annuity Plan from an insurance company of the Participant's choice.

The portion of accumulated balance to be placed in Part B will be calculated as follows:

$$\text{Part B} = \frac{\text{Accumulated Balance} * (\text{Years to live after retirement less age till termination of IPP})}{\text{Years to live after retirement (Assumed as per average life expectancy)}}$$

The portion of accumulated balance Placed in **Part-B** will be invested in both the approved **ALHIPF Equity Sub-Fund** and **ALHIPF Debt Sub-Fund** as per the following table:

Part B – Allocation Scheme		
<i>Years to termination of Income Payment Plan</i> are complete years to termination of Income Payment Plan at any date. So 3.1 or 2.9 years would be considered 3 years for the purpose.		
Years to termination of Income Payment Plan	% of Part B invested in ALHIPF Equity Sub-Fund	% of Part B invested in ALHIPF Debt Sub-Fund
10 or more	100%	0%
9	90%	10%
8	80%	20%
7	70%	30%
6	55%	45%
5	40%	60%
4	30%	70%
3	20%	80%
2	10%	90%
1	0%	100%

This table illustrates percentages set at different durations of Income Payment Plan. **However, the risk that Part B over the period invested does not rise in value as much as expected which may lead to lower real monthly annuity compared to the last withdrawn monthly pension from the Income Payment Plan.**

4. Payment of Pension

Drawing from the Income Payment Plan will commence after completing one month in the Plan. The payment will be made on the 25th day of every month, (or the first working day following that in the event the 25th is a closed day). AHIM will issue the instructions to the Trustee to credit the amount to the Participants designated banker.

Monthly payments under the Income Payment Plan shall not be in excess of the amount calculated through formulas mentioned in para (3) above.

5. Investment Policy

Investment in sub-funds will be made in accordance with the Investment Policy prescribed by the Commission from time to time.

6. Fees and Charges

Fees and Charges will be charged in line with the provisions of the Trust Deed. The Commission may review the fees specified from time to time and any change shall also be applicable to the Income Payment Plan.

7. The advantages and disadvantages of Conventional Annuities and Income Payment Plans:

Advantages and disadvantages of annuities and Income Payment Plan are as under:-

Advantages of the Conventional Annuities:

- Simple, easy to understand
- Once set up, income is fixed and secure
- The income will never run out, however long an individual is alive
- Available for funds of all sizes
- No ongoing reviews required
- No investment risk: not affected by stock market falls, or economic slumps

Disadvantages of the Conventional Annuities:

- Can be inflexible
- Cannot be changed
- An annuity (without value protection) cannot generally be passed on to the successors as a lump sum
- Current annuity plans do not offer any inflation protection
- Current annuity rates are perceived to be low
- Spouse's benefits must be set up at outset – so can be wasted on divorce or if spouse dies first
- Not affected by stock market rises

Advantages of the Income Payment Plan (unsecured Pension) before age 75

- An individual does not have to make a one-off decision
- Individual retains investment choice and control
- Can potentially pass the unutilized fund in lump-sum on to the successors (less tax where applicable)
- More flexible

- An individual can plan the income he receives to match his requirements
- Participants achieve their lifestyle through the monthly withdrawals in an increasing pattern attempting to keep up with rising inflation
- Potential for growth and increasing income

Disadvantages of the Income Payment Plan (unsecured Pension) before age 75:

- More complex, an individual may need advice
- Requires regular review

8. Death of the participant

In case of death of a participant before the completion of the Income Payment Plan, all the units of the sub-funds in Part A and Part B to his credit shall be redeemed at the net asset value notified at close of the day of intimation of death and the amount due shall be credited to his Individual Pension Account, which shall earn the applicable market rate of interest for such deposits.

The total amount in the Individual Pension Account of the deceased participant shall be divided among the nominated survivors according to the succession certificate issued in accordance with law for the time being in force and each of the nominated survivor shall then have the following options, namely :-

- (a) withdraw his share of the amount subject to the conditions laid down in the Income Tax Ordinance 2001 (XLIX of 2001);
- (b) transfer his share of the amount into his existing or new individual pension account to be opened with the Pension Fund Manager, according to VPS Rules;
- (c) use his share of the amount to purchase an annuity on his life from a Life Insurance Company, only if the age of the survivor is fifty-five years or more;
- (d) use his share of the amount to purchase a deferred annuity on his life from a Life Insurance Company to commence at age fifty-five years or later.

9. Nominee

The individual participant may designate and also change the Nominee under the Income Payment Plan. In registering a nomination, the Pension Fund Manager does not accept any responsibility as to its validity, legal effect or meaning.

10. Term of the Income Payment Plan

There is no maximum term for the Income Payment Plan as long as the plan terminates at or before age 75, at which point the individual has to purchase an annuity or withdraw the funds after paying tax on them. Plan must however be of at least one complete year.

11. Transfer of Funds under Income Payment Plan

The Participants have the options during the tenure of the Income Payment Plan to transfer the remaining balance (Part A & Part B) to another Pension Fund Manager or life insurance company to purchase an Approved Income Payment Plan or an Approved Annuity Plan respectively. No fee will be charged to participants in case of incoming transfers into the Income Payment Plan.

12. Winding Up

In the event of winding up of the Alhamra Islamic Pension Fund the units standing to the credit of the Participants will be dealt with in the light of VPS Rules, 2005 and Trust Deed.

13. Validity of the Terms of the Income Payment Plan

Should there be any changes in the Income Tax Ordinance or due to any directive given by the Commission under the Voluntary Pension System Rules in respect of the Income Payment Plan, the Pension Fund Manager may vary the benefits and conditions as directed by the Commission. Notice in writing of any such variation shall be sent to last address of the individual recorded by the Pension Fund Manager.

14. Approval

The Income Payment Plan of MCB Investment Management Limited has been approved by the Commission.

However, it must be distinctly understood that such Approval or authorisation neither implies official recommendation by the Commission to contribute into the Pension Fund nor does the Commission take any responsibility for the financial soundness of the Income Payment Plan offered by MCB Investment Management Limited.

15. Risk disclosure

- The Sub-Fund(s) target return cannot be guaranteed. The portfolio of the Sub-Fund(s) is subject to market fluctuations and risk inherent in all such investments. It should be noted that the value/price of Units of the Sub-Funds can fall as well as rise.
- Income drawdown will reduce the size of accumulated balance and the investment growth may not be sufficient to maintain the level of income. The level of income taken out may need to be reviewed if the balance amount becomes too small.
- Investment performance may be lower than the assumptions made.
- The income received may be lower or higher than the amount that could have been received from an annuity, depending on the performance of investments.
- As annuity rates can change substantially and rapidly, there is no guarantee that at the time of purchasing an annuity, the rates will be favourable.
- The Units of Sub-Funds are not bank deposits and are neither issued by, insured by, or the obligation of the Commission, any Government agency, any of the shareholders or the Pension Fund Manager, or any other bank or financial institution.

Conversely, purchasing a life annuity at retirement is advised in the following circumstances:

- The retiree expects to live longer than the average life expectancy assumed in annuity prices.
- The retiree is of the view that interest rates would fall in future.
